

# WOTAN

## Straight from Heaven: WOTAN

Just like descended from Wallhall, home of the Northern Gods, the new Custom Chrome promotionbike is a symphony of chrome and flames: Featuring handcrafted rolling chassis and several tricky technical „gizmos“, Wotan illustrates the state of the art in European customizing. With the support of a professional partner like Custom Chrome Europe, anything goes. Fred Kodlin orders all the parts that now form this masterpiece at Custom Chrome Europe, where he could choose from the broadest variety of parts on the entire H-D® aftermarket. Germany's most popular Customizer has already built several promotion-bikes for Custom Chrome Europe, but this is going to top them all: The first European Custom to grace the frontpage of Custom Chrome's international Catalogue. From the flashing chrome of the Jesse James frontwheel to the flaming rear fender, handcut by „Steel Master“ Fred Kodlin – this is a bike you will look at for a long, long time.
